This catalog contains information on all parts and assembly units of vehicles Ch35S3-E28, Ch35D3-E28, Ct35S3-E28, Ct35D3-E28, V35S3-E28, V35C3-E28 and their complete sets in the form of drawings and specifications.

The drawings have been prepared in order to provide maximum information on the engine design. They are presented as isometric views of parts and assembly units in exploded form.

The specifications provide designation, name and quantities of parts and assembly units.

The catalog does not mention parts included in the permanent joints (welded, soldered, etc.), as well as the components that are not repaired and are replaced with the whole assembly unit.

This catalog of parts and assembly units is a reference tool for service centers and enterprises involved in maintenance and repair of the vehicles for they make the necessary calculations and prepare orders for replacement parts.
